SUMMARY

Fresh graduate in D3 Informatics Engineering with hands-on experience building end-to-end full-stack web applications, from database design and REST APIs to user interfaces using ASP.NET Core, Laravel, FastAPI, and Vue.js. Designed a multi-tier approval e-procurement system with machine learning integration for automatic classification, and a secure e-voting system serving 3,400+ registered voters. Software QA experience on an enterprise-scale pension fund application reinforced a strong attention to code quality and reliability.

EDUCATION

University of Logistics and Business International, Bandung *Sep 2023 – Sep 2026*
Diploma, Informatics Engineering

- GPA 3.86 of 4.00

WORKING EXPERIENCE

PT Primalogic Global Teknologi, Jakarta *Mar 2026 – May 2026*
Software Quality Assurance Intern

- Conducted Vendor Integration Testing for an enterprise-scale pension fund application.
- Executed 214 of 1,500+ manual test cases using State Transition Testing methodology, verifying expected system behavior across core workflows.
- Identified and reported 60 system defects, collaborating with developers during regression testing to ensure issue resolution.
- Documented test scenarios and results in structured test reports, improving traceability throughout the QA process.

Majelis Permusyawaratan Mahasiswa – Pemira E-Voting Website, Bandung *Sep 2024 – Jan 2025*
Freelance Fullstack Developer

- Engineered a secure Laravel-based voting backend enforcing one-vote-per-student integrity, session-based login restrictions, and automatic logout to prevent fraudulent votes.
- Digitized the university's fully manual, paper-based election process, cutting vote-counting time by over 90% and reducing operational costs by approximately 30%.
- Built an admin dashboard with Filament for voter & candidate management.
- Designed and implemented the front-end voting flow (login, ballot selection, voting interface) for a system serving 3,458 eligible voters, reliably processing 1,124 votes without errors or duplication.
- Deployed the website to a local hosting provider with domain configuration.

PROJECTS

ProFlowApp – Internal E-Procurement System, Bandung *Mar 2026 – Aug 2026*
Fullstack Developer

- Built an internal e-procurement system (ASP.NET Core MVC, SQL Server) managing purchase requests from submission through role-based approval.
- Designed a staged approval workflow across Karyawan, Checker, and Manager roles with automatic Purchase Order creation upon approval.
- Integrated a Python/Flask microservice achieving 95% accuracy in automatic urgency classification, with fallback handling to ensure system resilience.
- Implemented security features (Bcrypt hashing, anti-forgery tokens, rate limiting) and audit logging for critical actions.
- Delivered reporting and PDF/Excel export functionality via SSRS integration.

TabunganKu AI – Savings Web Application, Bandung *Feb 2026 – Mar 2026*
Fullstack Developer

- Engineered a full-stack savings-tracking application integrating Computer Vision to automate manual savings logging.

- Trained and validated a YOLOv8 model achieving 98.7% detection accuracy (mAP50) in Rupiah banknote recognition, eliminating manual entry via notes apps or messaging tools.
- Implemented backend logic using FastAPI to process image streams and automatically calculate total currency accumulation.
- Developed a reactive and responsive frontend dashboard using Vue.js 3 and Tailwind CSS to ensure optimal display across all devices.
- Designed and optimized the database structure using MySQL to manage user balances and store saving logs.

KuyKontak – Mobile Contact Application, Bandung *Jun 2025 – Jul 2025*

Fullstack Developer

- Developed RESTful APIs for a contact management application using two backend stacks — Express.js with MongoDB and CodeIgniter 4 with MySQL — gaining hands-on experience with both NoSQL and relational database architectures.
- Implemented core back-end features including CRUD operations, data synchronization, and favorites management across both API implementations.
- Designed and optimized API endpoints to support integration with a Flutter mobile application.
- Enhanced user experience through responsive UI design with light/dark mode support and efficient data handling.
- Deployed the Express.js API securely via Cloudflare Tunnel and the CodeIgniter 4 API on a conventional hosting provider.

TRAININGS AND CERTIFICATIONS

Google Cybersecurity Professional Certificate — Coursera *Nov 2025*

Google AI Essentials — Coursera *Oct 2025*

Junior Web Developer — BNSP *Oct 2022*

Back-End Development with JavaScript — Dicoding *Sep 2024*

Learn to Create a Web Front-End for Beginners — Dicoding *Jun 2024*

Learn Back-End Application Fundamentals — Dicoding *Feb 2024*

LANGUAGES AND SKILLS

Languages: Indonesian (Native), English (Conversational).

Programming: C#, Python, Dart, JavaScript, PHP.

Frameworks: ASP.NET Core, FastAPI, Flask, Flutter, Vue.js, Express.js, Laravel, CodeIgniter 4, Filament.

Database: MySQL, PostgreSQL, MongoDB, SQL Server.

Tools: Git, GitHub, Postman, Visual Studio Code, SQL Server Management Studio, SQL Server Reporting Services, Cloudflare Tunnel.

Soft Skills: Teamwork, Communication, Problem Solving, Critical Thinking.
