SUMMARY

Fresh graduate in D3 Informatics Engineering with hands-on experience in Back-End and Fullstack Web Development through academic, freelance, and independent projects, including a secure web-based e-voting system and AI-powered applications. Gained enterprise-scale software testing experience through a Software Quality Assurance internship for a pension fund application. Experienced in developing RESTful APIs, applying Computer Vision and Machine Learning. Passionate about developing efficient, reliable, and intelligent software solutions while continuously expanding expertise as a Backend Developer and Fullstack Developer.

WORKING EXPERIENCE

PT Primalogic Global Teknologi, Jakarta

Mar 2026 – Mei 2026

Software Quality Assurance Intern

- Conducted Vendor Integration Testing for an enterprise-scale pension fund application.
- Executed 214 manual test cases using State Transition Testing methodologies and verified expected system behavior.
- Reported 60 system defects and collaborated with developers during regression testing to ensure issue resolution.

Majelis Permusyawaratan Mahasiswa – Pemira E-Voting Website, Bandung

Sep 2024 – Jan 2025

Freelance Fullstack Developer

- Developed the back-end system using Laravel, focusing on election integrity and security.
- Designed core voting logic: one vote per student, login restriction, and auto logout.
- Built an admin dashboard with Filament for voter & candidate management.
- Designed and implemented front-end pages for login, voting menu, and voting interface to ensure a clear and user-friendly voting flow.
- Deployed the website to a local hosting provider with domain configuration.
- Successfully supported the election with 3,458 registered voters and 1,124 valid votes recorded.

PROJECTS

ProFlowApp – Internal E-Procurement System, Bandung

Mar 2026 – Aug 2026

Fullstack Developer

- Built an internal e-procurement system (ASP.NET Core MVC, SQL Server) managing purchase requests from submission through role-based approval.
- Designed a staged approval workflow across Karyawan, Checker, and Manager roles with automatic Purchase Order creation on approval.
- Integrated a Python/Flask microservice for automatic urgency classification, with fallback handling for resilience.
- Implemented security features (Bcrypt hashing, anti-forgery, rate limiting) and audit logging for critical actions.
- Built reporting and PDF/Excel export functionality via SSRS integration.

TabunganKu AI – Savings Web Application, Bandung

Feb 2026 – Mar 2026

Fullstack Developer

- Engineered a full-stack web application integrated with Computer Vision to automate manual savings tracking.
- Developed a real-time currency scanner utilizing YOLOv8 to accurately identify Rupiah banknotes via web camera feed.

- Implemented backend logic using FastAPI to process image streams and automatically calculate total currency accumulation.
- Built a reactive and responsive frontend dashboard using Vue.js 3 and Tailwind CSS to ensure optimal display across all devices.
- Designed and optimized the database structure using MySQL to manage user balances and store saving logs.

KuyKontak – Mobile Contact Application, Bandung
 Jun 2025 – Jul 2025

Fullstack Developer

- Developed RESTful APIs for contact management using Express.js (MongoDB) and CodeIgniter 4 (MySQL).
- Implemented core back-end features, including CRUD operations, data synchronization, and favorites management.
- Designed and optimized API endpoints to support integration with a Flutter mobile application.
- Improved user experience through responsive UI design, light/dark mode support, and efficient data handling.
- Deployed the Express.js API locally and exposed it securely using Cloudflare Tunnel, while deploying the CodeIgniter 4 API on a conventional hosting provider.

EDUCATION

University of Logistics and Business International, Bandung
 Sep 2023 – Aug 2026

Diploma, Informatics Engineering

- GPA 3.86 of 4.00

TRAININGS AND CERTIFICATIONS

Coursera
Nov 2025

Google Cybersecurity Professional Certificate

Coursera
Oct 2025

Google AI Essentials

BNSP
Oct 2022

Junior Web Developer

Dicoding
Sep 2024

Back-End Development with JavaScript

Dicoding
Jun 2024

Learn to Create a Web Front-End for Beginners

Dicoding
Feb 2024

Learn Back-End Application Fundamentals

LANGUAGES AND SKILLS

- **Languages:** Indonesia, English.
- **Programming :** C#, Python, Dart, JavaScript, PHP.
- **Frameworks:** ASP.NET Core, FastAPI, FlaskAPI, Flutter, Vue.js, Express.js, Laravel, CodeIgniter 4.
- **Database:** MySQL, PostgreSQL, MongoDB, SQL Server.
- **Tools:** Git, GitHub, Postman, Visual Studio Code, SQL Server Management Studio, SQL Server Reporting Services.
- **Soft Skills:** Teamwork, Communication, Problem Solving, Critical Thinking.
